Skills Lab

University Leipzig Faculty of Medicine

Seminar Title: “Scientific English in Presentation and Discussion – speaking English with self-confidence!”

“The seminar will focus on how to introduce, listen, speak about and present

the research topics and results in health sciences in English. We will discuss experts on high-class research of the Nobel Prize Laureate in Physiology and Medicine 2009, Prof. Dr. Harald zur Hausen of the German Cancer Research Institute in Heidelberg, Germany.”

She will also focus on one scientific theme, to practice discussion techniques and convey the presentation of science. She prepares and collects several opinion papers of Japanese postdocs and professors working in Germany and States. They are worthwhile discussing with graduate and medical students.”

“The colloquium will be held on the 15th July. Graduate students present research data and are given the comments from commentators. The main purpose of this colloquium is enhancement of the English presentation skills of the graduate students and promotion of their international communication abilities.”
