

DSK Mini-Symposium

Perspectives in **Cancer** Biology

October 1, 2013; Inamori Hall, Shiran-Kaikan
Kyoto University Graduate School of Medicine

13:00 **Opening Remarks**

Nagahiro Minato (Dean, Graduate School of Medicine; Professor of Immunology)

Session 1. Guardians of the cell

Chairman: **Makoto Noda** (Core Member, LMCR; Professor of Molecular Oncology)

13:10-14:00 RUNX Proteins are up-stream regulator of p14ARF-p53 tumor suppressor pathway

Yoshiaki Ito (National University of Singapore)

14:00-14:50 Regulation of cell growth and death by Tob protein

Tadashi Yamamoto (Okinawa Institute of Science and Technology)

- Break -

Session 2. From bedside to bench to bedside

Chairman: **Masakazu Toi** (Core Member, LMCR; Professor of Breast Surgery)

15:10-15:40 Translational approaches for the development of new drugs for kidney cancer

Eijiro Nakamura (Associate Professor, LMCR)

15:40-16:10 Molecular mechanism of MLL-associated leukemia

Akihiko Yokoyama (Associate Professor, LMCR)

16:10-17:00 Molecular mechanisms of digestive tract carcinogenesis

Tsutomu Chiba (Director, Cancer Center;
Professor of Gastroenterology)

17:00 **Closing Remarks**

Shuh Narumiya (Director, Medical Innovation Center)
