

第4回研究交流サロン ポスター賞受賞者

/The 4th Research Networking Salon poster award winners

1.Presenter 2.Position 3.Affiliation 4.Title

1. Jason Choi
2. Master
3. CiRA
4. Development and application of CRISPR-Cas3 genome editing and NanoMEDIC

1. Mayuki Omatsu
2. PhD
3. Med
4. Tumor-infiltrating monocyte-like cells create metastasis-promoting immunosuppressive microenvironment via THBS1 production in aggressive colorectal cancer

1. Kenkyo Matsuura
2. non-PI
3. LiMe
4. Activated branched-chain amino acid metabolism regulates the aggressive nature in human triple-negative breast cancer

1. Akira Yamagata
2. PhD
3. CiRA
4. Disease modeling of pulmonary alveolar microlithiasis using human induced pluripotent stem cells

1. Souta Motoike
2. PhD
3. CiRA
4. Generation of jawbone organoids from human pluripotent stem cells via first pharyngeal arch ectomesenchyme

1. Saaya Imahori
2. Master
3. Med
4. Developing a method for specifically targeting pathogenic B cells with self-antigen epitope-mimetic peptides.

1. Aoi Taniguchi
2. PhD
3. Pharm
4. Selective anticancer activities of low pH-responsive anticancer peptides and a peptide-anticancer drug conjugate

1. Reon Minamida
2. Master
3. Med
4. Generation of low molecular weight antibody library by mouse antibody CDR grafting

1. Tomohisa Hosokawa
2. non-PI
3. Med
4. Regulation of Memory Formation through Liquid-Liquid Phase Separation

Congratulations!
